

Getting Started - Installation

What you need,

- ✓ Mobile Device
- ✓ Active Internet connection
- ✓ Wi-Fi Router with at least one other available Ethernet port

1) First make sure the Ethernet cord is connected to the camera and to a Wi-Fi enabled Router.

* Note that the camera will have to stay connected to the router or switch. This will make viewing the video from your Smartphone or other Wi-Fi enabled devices possible.

2) When the camera and router/switch are connected you can then set up the AvacomPro app for viewing.

Getting Started - Mobile App Installation

What you need,

- ✓ Mobile Device
- ✓ Active Internet connection
- ✓ Wi-Fi Router with at least one other available Ethernet port
